| <p>The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.</p> |  |   |                                    |

## COVER

Scanning electron micrograph of an erythrocyte enmeshed in fibrin. Part of a thrombus found on the inner surface of an intravenous catheter implanted proximal to the heart (about  $\times 20,500$ ). [Emil Bernstein and Eila Kairinen, Gillette Company Research Institute, Rockville, Maryland]
